Education

K. K. Wagh Institute of Engineering Education & Research	Nashik, India
Bachelor of Technology - Computer Engineering ; Second Year	July 2023 - June 2027

Skills Summary

- **Languages :** Python, C++, JavaScript, Bash, JAVA
- **Frameworks :** TensorFlow, Django, Flask, NodeJS
- **Tools :** GIT, PostgreSQL, MySQL
- **Platforms :** Linux, Web, Windows, Kali Linux
- **Soft Skills :** Leadership, Event Management, Writing, Public Speaking, Time Management

Objective

Motivated second-year student pursuing a degree in Computer Engineering, with a strong passion for cybersecurity and hands-on experience in areas such as penetration testing, vulnerability assessment, and ethical hacking. Actively practicing and expanding knowledge in cloud security, network defense, and incident response. Eager to contribute to a cybersecurity team by applying technical skills, learning from real-world challenges, and continuing to develop expertise in cutting-edge security technologies. Seeking an opportunity to gain practical experience through internships or projects in cybersecurity.

Experience

- SNS Community (Secure Net Society)
  - Cybersecurity Enthusiast & Active Contributor
  - Collaborated with a global network of cybersecurity professionals and enthusiasts to explore and develop strategies for safeguarding digital assets in an evolving landscape.

Projects

- Event Management Platform (Client & Manager Interface): Developed a web-based platform enabling clients to post event requirements and event managers to manage bookings. Facilitated real-time communication and event tracking.
  Tech: HTML, CSS, JavaScript, MongoDB

- Plagiarism Checker for AI-Generated Code: Developed a web-based tool to detect plagiarism in AI-generated code. Enabled users to upload code and receive detailed reports on code similarities and potential plagiarism. Tech: Python, Django, MongoDB, API, HTML, CSS, JavaScript

- Website Threat Detection System (Ongoing)
  Developed a web-based system for detecting malware and malicious activities on websites. The platform scans websites for potential threats, including malware, phishing attempts, and harmful scripts, and alerts administrators of suspicious activities.
  Tech: Python, JavaScript, Selenium, Flask, MySQL, Docker
